

CHINMAY RAJGURU

Senior Product Manager & Enterprise AI Architect | GenAI, LLMs, Spatial Computing | Ph.D.

hello.chinmayrajguru@gmail.com | +91-9892210115 | [LinkedIn](#) | [Portfolio](#) | Mumbai, Maharashtra, India

PROFESSIONAL SUMMARY

Senior Product Manager and Enterprise AI Architect with 8+ years of experience taking frontier technologies (GenAI, LLMs, Spatial Computing) from ambiguity and proof-of-concept through enterprise adoption and measurable business value. Ph.D. in Informatics with a track record of leading global cross-functional teams to deliver AI, cloud-native, and XR solutions from initial discovery through prototype to scaled production.

CORE STRENGTHS

- **Product Leadership:** Product strategy, roadmap ownership, stakeholder alignment, Agile execution, user research, go-to-market
- **Enterprise AI Architecture:** LLMs, RAG, LangChain, vector databases, knowledge systems, intelligent automation
- **Cloud-Native Engineering:** Python, FastAPI, Docker, Kubernetes, CI/CD, Azure DevOps, GitLab, AWS, Azure
- **Spatial Computing & XR:** WebVR, Unity 3D, volumetric media, spatial audio, AR/VR, HCI

PROFESSIONAL EXPERIENCE

Senior Product Manager – FinTech & AI Workflows

Apr 2026 – Present

Abans Finserv, Mumbai, India

- **Owns end-to-end product strategy and lifecycle** for capital markets trading platforms, including the flagship Dealer Pad application.
- **Leads a cross-functional delivery team** (2 QA engineers, 1 Business Analyst), implementing AI-augmented Playwright automation to convert user requirements into automated regression tests for faster, safer releases.
- **Integrated Generative AI (Claude Code)** into the PM workflow to accelerate discovery, PRD creation, and UI/UX mockup generation.
- **Conducts deep user research** with financial dealers to identify friction points in time-critical trading flows.
- **Drives Agile execution** in Jira and Confluence, translating complex capital market requirements into engineering deliverables and sprint-level bug resolution.

Technical Project Lead & Enterprise AI Architect

Apr 2023 – Mar 2026

GKN Aerospace, Bengaluru, India

- **Delivered \$30M+ in business value** through AI-enabled process improvements and enterprise architecture initiatives.
- **Led global cross-functional teams** across 3+ international sites (UK, Sweden, Netherlands) and helped secure \$10M+ in innovation funding.
- **Architected secure on-prem LLM and RAG solutions**, reducing cloud dependency by 30% while supporting strict aerospace compliance needs.
- **Built scalable backends and DevOps pipelines** using Python, FastAPI, Docker, Kubernetes, Azure DevOps, and GitLab.
- **Developed a computer vision-based aerospace inspection solution** using OCR and YOLO, transforming a manual factory process into a scalable AI-enabled workflow and industrialization roadmap.

UX Researcher & Ph.D. Candidate (Spatial Computing and Acoustics)

Feb 2019 – Jan 2023

University of Sussex, Brighton, UK

- **Invented and developed AudioZoom**, a localized spatial sound delivery platform combining acoustic metamaterials, computer vision, immersive environments, and human-centered experimentation.
- **Directed psychoacoustic studies** with 210+ participants to define UX-relevant measures for spatial presence and cognitive load.
- **Published 8+ peer-reviewed papers** in top-tier venues including Nature Scientific Reports, ACM SIGGRAPH, and JASA.

3D Pipeline Engineer (AR/VR)

Mar 2018 – Dec 2018

8i Labs, Los Angeles, CA

- **Developed production-grade AR/VR tools** and 3D capture pipelines for volumetric and holographic media.
- **Processed 500+ media assets** using Python and AWS infrastructure, ensuring on-time delivery to enterprise clients.
- **Built automation tools** for calibration and 3D rendering, improving production efficiency by 15%.

EDUCATION

- **Ph.D. in Informatics (UX, Spatial Computing and Acoustics)** — University of Sussex, UK | 2019 – 2023
- **M.S. in Computer Science (AI and Game Development)** — Southern Illinois University, USA | 2016 – 2017
- **B.Tech. in Computer Engineering** — SVKM's NMIMS, India | 2011 – 2015

TECHNICAL SKILLS

- **Product:** Product lifecycle, road mapping, Agile/Scrum, user research, GenAI strategy, stakeholder management, Jira, Confluence
- **AI/Data:** LLMs, RAG, LangChain, vector databases, Neo4j, data governance, MS Fabric, Purview, Power BI, intelligent automation
- **XR:** Spatial computing, Unity 3D, WebVR, volumetric media, spatial audio, AR/VR, HCI
- **Engineering:** Python, FastAPI, AWS, Azure, Docker, Kubernetes, CI/CD, GitLab, Azure DevOps, microservices

AWARDS & RECOGNITION

- Rookie of the Year, GKN Aerospace (Dec 2023)
- Employee of the Month, GKN Aerospace (May 2024)
- Graduate Tuition Award, Southern Illinois University (2017)
