Mumbai, Maharashtra, India

PROFESSIONAL SUMMARY

Enterprise AI architect and innovation leader with 8+ years turning frontier technology into adopted, real-world systems across FinTech, aerospace, and immersive computing. A Ph.D. in Spatial Computing underpins a consistent pattern: walk into ambiguity, prototype fast, validate with people, and architect the result to scale. Repeatedly carried ideas from proof-of-concept to industrialization across global teams (UK, Sweden, Netherlands, India), winning executive buy-in and delivering measurable business value.

CORE STRENGTHS

- **Innovation & 0-to-1 Delivery:** Emerging-tech discovery, proof-of-concept to industrialization, rapid prototyping, executive buy-in
- **Enterprise AI Architecture:** On-prem LLMs & RAG, knowledge systems, intelligent automation, secure and compliant AI adoption
- **Spatial Computing & XR:** Spatial audio, AR/VR, volumetric media, acoustic metamaterials, HCI
- **Cross-Functional Leadership:** Global teams, stakeholder alignment, technical-to-business communication, consensus building

PROFESSIONAL EXPERIENCE

Senior Project Leader

Apr 2026 – Present

Abans Finserv, Mumbai, India

- Designed and built an in-house, full-UI test-automation application (Playwright + Claude Code) that cut Dealer Pad regression from a chaotic 2-day-to-1-week manual effort to a repeatable 2–3 hour automated run with auto-generated pass/fail and bug reports.
- Established Confluence as the single written source of truth between business users and a 6-engineer team (3 frontend, 3 backend), sharply reducing miscommunication and the recurring bugs that had destabilized releases.
- Drive module-level design and behavior decisions for Dealer Pad — the firm's core trading platform used by 40+ staff across deal entry, hedging, ETFs, warehouse transfers, cash, and Tally reconciliation — validating direction through user research and mock UIs before build.
- Embedded GenAI (Claude Code) across discovery, requirements, ticketing, and documentation, significantly accelerating delivery turnaround across a 15-day sprint cadence.
- Grew the automated regression suite to 80+ cases, expanding it each sprint as features ship, and built it UI-first so non-technical users can run validation independently.

Technical Project Lead & Enterprise AI Architect

Apr 2023 – Mar 2026

GKN Aerospace, Bengaluru, India

- Delivered \$30M+ in quantifiable business value through AI-enabled process improvements and enterprise architecture initiatives.
- Led global cross-functional teams across 3+ international sites (UK, Sweden, Netherlands) and helped secure \$10M+ in innovation funding.
- Architected secure on-prem LLM and RAG solutions, reducing cloud dependency by 30% while meeting strict aerospace compliance (ITAR) constraints.
- Built scalable backends and DevOps pipelines using Python, FastAPI, Docker, Kubernetes, Azure DevOps, and GitLab.
- Created a data governance framework (MS Fabric, Purview, Power BI) and automated factory OCR / computer-vision workflows, saving 500+ hours annually.

UX Researcher & Ph.D. Candidate (Spatial Computing & Acoustics)

Feb 2019 – Jan 2023

University of Sussex, Brighton, UK

- Invented AudioZoom, a headphone-free localized spatial-audio system combining acoustic metamaterials, computer vision, and Unity/IoT integration — taken from concept to working prototype to publication.
- Directed psychoacoustic studies with 210+ participants to define UX measures for spatial presence and cognitive load.
- Published 8+ peer-reviewed papers in top-tier venues including Nature Scientific Reports, ACM SIGGRAPH, and JASA.

3D Pipeline Engineer (AR/VR)

Mar 2018 – Dec 2018

8i Labs, Los Angeles, CA

- Built production-grade AR/VR tools and 3D capture pipelines for volumetric and holographic media.
- Automated volumetric media processing with Python and AWS, handling 500+ assets with on-time enterprise delivery.
- Built calibration and 3D-rendering automation, improving production efficiency by 15%.

EDUCATION

- **Ph.D. in Informatics (Spatial Computing & Psychoacoustics)** — University of Sussex, UK | Feb 2019 – Jan 2023
- **M.S. in Computer Science (AI and Game Development)** — Southern Illinois University, USA | Aug 2016 – Dec 2017
- **B.Tech. in Computer Engineering** — SVKM's NMIMS, India | Aug 2011 – Jul 2015

TECHNICAL SKILLS

- **Product:** Product lifecycle, roadmapping, Agile/Scrum, user research, GenAI strategy, stakeholder management, Jira, Confluence
- **AI/Data:** LLMs, RAG, LangChain, vector databases, Neo4j, data governance, MS Fabric, Purview, Power BI, intelligent automation
- **XR:** Spatial computing, Unity 3D, WebVR, volumetric media, spatial audio, AR/VR, HCI
- **Engineering:** Python, FastAPI, AWS, Azure, Docker, Kubernetes, CI/CD, GitLab, Azure DevOps, microservices

AWARDS & RECOGNITION

- Rookie of the Year, GKN Aerospace (Dec 2023)
- Employee of the Month, GKN Aerospace (May 2024)
- Graduate Tuition Award, Southern Illinois University (2017)
